Things to keep in mind

- Out of balance journals will not convert. If one-sided entries have been made, one or more adjusting entries will need to be made (based on posting periods).
 - Each one doesn't need to be entered, an accumulative entry can be made
- Customized reports and forms for updated modules must be rebuilt.
- Visual integrator jobs for updated modules must be recreated.
- All open batches in all modules must be posted before the upgrade takes place, un-posted batches will be lost.
- Dot matrix printers may not be compatible with updated modules.
- All users must remain out of MAS 90 for the duration of the upgrade.
