

Deltek Vision[®] Mobile Applications Suite

Access Anywhere, Anytime for Improved Productivity

DELTEK VISION MOBILE APPLICATIONS SUITE:

- Leverage your IT investments
- Mobile Time and Expense capturing
- Mobile CRM access
- Disconnected access
- Key features and benefits

As a project-focused professional services firm, you rely on your mobile workforce. You cannot delay productivity simply because employees are not in the office. To keep your workforce operating as a unified team—both on and off the road—you need them to stay connected to the information and processes that drive your business. The Deltek Vision Mobile Applications Suite ensures your employees are productive no matter where they are.

LEVERAGE YOUR IT INVESTMENTS

Vision Mobile Applications Suite turns your firm's laptops, smart phones, personal digital assistants (PDAs) and handheld devices into effective and reliable business productivity tools that deliver tangible value to your firm. From the disconnected laptop to a variety of mobile devices in either connected or disconnected mode, Deltek Vision makes it possible for your applications to adapt to the patterns of your workforce.

MOBILE TIME AND EXPENSE CAPTURING

Employee time and expenses directly drive your revenue and profitability. And your ability to manage employee time and expenses in a fast-paced and mobile environment is critical to your success. You need the right set of tools in your IT arsenal to capture this information efficiently and accurately. Deltek Vision's mobile time and expense applications ensure these project-related costs are collected and invoiced in the most efficient manner possible.

MOBILE CRM ACCESS

Your business development team does not have a moment to spare. With Vision Mobile Applications, they can access Vision CRM data from anywhere and anytime with their hand-held device:

- Add, edit or delete Vision clients, contacts, opportunities and activities using a hand-held device
- Synchronize information from a hand-held device with the Vision database at any time, using a secure connection
- Enter Info Center data from a hand-held device that will trigger applicable workflows

DISCONNECTED ACCESS

For employees that do not have immediate access to an internet connection via their laptop or hand-held, Vision Mobile Applications allows them to work in disconnected mode. Once a connection can be re-established, the data they have entered can be synchronized with Vision. This is a great feature for employees that want to enter time and expense statements or create CRM data while in the air or in a travel location without internet service.

KEY FEATURES AND BENEFITS

Give your Employees Access to Critical Business Information anywhere, anytime —

Your business does not stop when your employees are on the road, and neither should your applications.

Make the Most of your IT Investments—

Extend the power of your laptops, mobile devices and wireless network by allowing your employees access to critical information regardless of location.

Improve Productivity—

With mobile access, your employees remain connected and productive while on the road.

Improve Cash Flow—Collect time and expenses in real-time to speed up invoicing and expedite payments.

Reduce Errors and Omissions—Capturing time and expenses as they incur reduces the chance of errors and omissions.

With the Vision Mobile Application Suite from Deltek, you can keep your employees connected, capture critical information in a timely manner and turn your mobile devices into efficient business productivity tools that deliver tangible value to your firm.
