

## Return to Vendor for SYSPRO

### Overview

To provide an efficient method of controlling the return and exchange of items bought from suppliers, ensuring visibility and tracking of the item until the transaction is concluded.

### The Value of Return to Vendor for SYSPRO (RTV)

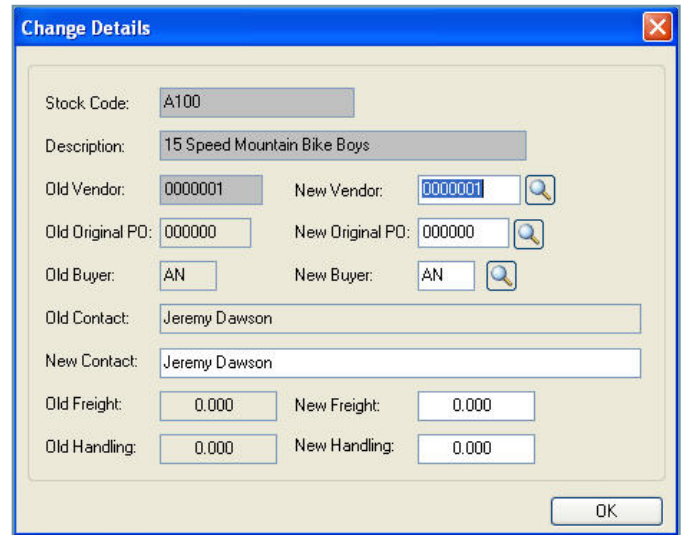

- Provide complete visibility of returned inventory
- Track returned items that are outstanding
- Allow for credit notes and replacement items from vendor
- Tracks costs of items not replaced by vendor
- Retain unlimited history of RTV transactions

### Matching RTV to your business

- Ensures that items to be returned to the vendor are removed from the available stock and held in a review area while the terms for return are negotiated
- Handle stocked and non-stocked items
- Track variances between cost of item and credit received
- Manage items to return through the RTV review process
- Issue items directly to the RTV review area, while processing a return from a customer (RMA)
- Add non-stocked items on the fly during the review process
- Transfer stocked items immediately to the RTV area during the receiving process
- Create GRN which can be matched against supplier's credit note
- Create Purchase Order for expected replacement items

### Integration

- Integrates with Accounts Payable, General Ledger, Inventory, Purchase Orders (including GRN suspense) and Return Merchandise
- E-mail reports with Office Automation
- RTV for SYSPRO requires the Accounts Payable, Inventory Control, and Purchase Orders modules
